**MICHAEL
SPIRIG**

CEO

European Electrolyser &
Fuel Cell Forum

| **Wrap up and closing by the Organizers**

TALK TITLE

Welcome by the Organizers

ABOUT

Michael is an entrepreneur and long-standing leader in the field of electrolysis and fuel cell technologies, with a strong focus on advancing sustainable energy systems and fostering international collaboration.

He is the CEO of EFCF AG and the driving force behind the European Electrolyser & Fuel Cell Forum (EFCF), a leading international platform dedicated to the science, engineering, and application of fuel cells, electrolysers, and hydrogen technologies. Under his leadership, EFCF has developed into a highly recognized forum bringing together academia, industry, and policy stakeholders. Michael has been actively involved in the organization and development of large-scale international conferences and expert networks, contributing to knowledge exchange and innovation in the hydrogen sector. He has played a key role in shaping interdisciplinary dialogue between research and industrial application, particularly in

the areas of electrolysis, fuel cells, and sustainable energy systems. Through his work, he has continuously supported the dissemination of high-quality scientific contributions, including conference proceedings, DOI publications, and collaborations with peer-reviewed journals. His commitment lies in strengthening the global hydrogen community and accelerating the transition towards low-carbon energy solutions.
