Advantages of POSTER presentation at the SSD

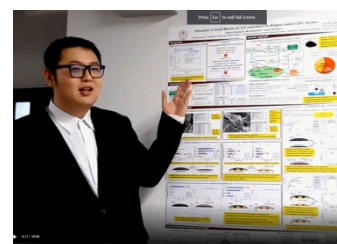

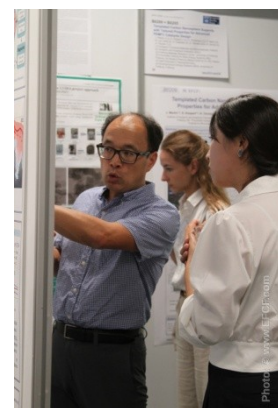

SSD poster is the opportunity to present your research in a lively, direct, understandable & sustainable way

A POSTER presentation of your contribution can provide unexpectedly high added value. SSD makes every effort to ensure that poster contributions, like oral presentations, are optimally perceived and achieve strong visibility, engagement, and networking opportunities.

Please do not think that posters at SSD are merely surplus contributions not included in the oral program or displayed in an unorganized manner. On the contrary, they are valued and presented as fully-fledged scientific or industrial contributions. Experience has shown that POSTERS offer valuable additions and many advantages:

POSTER contributions are

- ✓ **always accessible** for attendees throughout the whole conference, discussed in extended **daily poster sessions** and clearly **assigned to a topic** like all oral presentation;
- ✓ **listed in the program** and **Final Announcement**.
- ✓ also **published** with their **own DOI**, if the authors like it, in www.EFCF.com/DOI and also able to apply for **publication in the peer reviewed Journal - Special Issues** www.EFCF.com/SI - "FUEL CELLS" from Wiley-VCH or elsewhere.
- ✓ In Addition POSTER presentations can be **pre-recorded as MP4 file** & made available worldwide on a long-term basis at www.EFCF.com/COMMUNITY (see on "[Download](#)").

At the SSD, your poster presentation is **highly valued**, **fully integrated** into the overall program, and offers **significant added value for authors**.

Be proud to present your contribution as a poster & make clever use of the various opportunities to position yourself.

Win also with an SSD Poster Presentation
